

# Keep Your Modesty Intact .....

by Hilda Jerina, Image Consultant

Let's be frank and honest.

**Look at this picture of this very famous actor. Where do your eyes immediately focus on?**

**Do you look at her eyes? Do you look at her face? No! You get distracted by her nipples.**

Nipples projecting through t-shirts, turtlenecks, shirts, sweaters and other tops can destroy any outfit and attract unwanted attention to the wrong areas.

You want people to look at your most important part of your body – your face. It should be the first thing we notice and the last thing we remember about you – **not your nipples**. Unfortunately, most of us women, young and old, don't even realize that it is happening. When was the last time you checked in the mirror or paid attention or realized that this picture was you?

Thankfully, many stores are now selling an assortment of products that cover up your nipples. They are known as **nipple covers, breast petals or nipple petals** and are usually found in the lingerie section. These products are specifically designed to shield the nipples and prevent irritation. By using one of these products, you are 99% guaranteed to preserve your modesty while being stylish at the same time. You no longer have to be humiliated, embarrassed or uncertain if your nipples are going to show through your top.

## The secret of Nipple Covers

Nipple covers are designed to be discreet and plain. Their goal is not to make your nipples stand out but rather to create a smooth shape preventing nipple protrusions. These are actual covers not stick on tape or stick on bras.

Nipple covers are made of foam, cotton, and silicone and may be adhesive or non-adhesive. Some nipple covers are self-adhesive while others use medical-grade, hypoallergenic adhesives to stick to your skin. Others, like some silicone nipple covers stick to your skin by using your body heat to activate their natural adhesives. Non-adhesive nipple covers are to be use with bras.

Foam, cotton, and silicone nipple covers come in reusable and disposable styles. If most of your bras are thin or if your nipples

are especially sensitive, use the reusable nipple covers. If you don't go braless or if your nipples are not prone to showing through, use the disposable covers. For more information: [www.yourlingerieaccessories.com](http://www.yourlingerieaccessories.com)

### **Disposable Nipple Covers**

Designed for one-time use. They come in single or multiple pair packs. Hypoallergenic, medical-grade adhesives to prevent skin irritation. They stick securely.

### **Reusable and Foam Nipple Covers**

Usually made of foam. These are thin and tapered to hug the curves of your breasts. It is used inside a bra.

### **Silicone Nipple Covers**

With tapered and thin edges, the silicone nipple covers hug the shape of your breasts smoothly so there's no cover outline. Your body heat will warm the covers which will release their natural adhesive for no-pain sticking.

Nipple Covers are easy to use and not expensive. Depending on which one you choose, they can last you for years. It's so worth the investment. More importantly, when you wear them daily, they will give you the peace of mind knowing that your nipples will always be concealed regardless of what you wear, what you do and how you feel. Your "headlights" will never be turned on for the world to see. You'll always have the smooth lines creating the polished look.

So, the next time you go into Sears or The Bay (Shopper's Drug Mart also has them), I want you to go into the lingerie section and search for these covers. Purchase a set and start wearing them immediately. Get into the habit that when you put on your bra you put your nipple covers on. Simple as that.

**Never leave your house without your covers on!!**

***"Dress shabbily and they remember the dress; dress impeccably and they remember the woman"*** Coco Chanel
